UN MERVEILLEUX CADEAU

La LAMPE BERGER détruit les odeurs et fumées du tabac, les odeurs domestiques, et parfume discrètement.

Elle sera pour votre intérieur une marque de distinction ainsi qu'un élément de confort.

A BEAUTIFUL GIFT
A DECORATIVE ACCESSORY, A COLLECTIBLE ITEM...

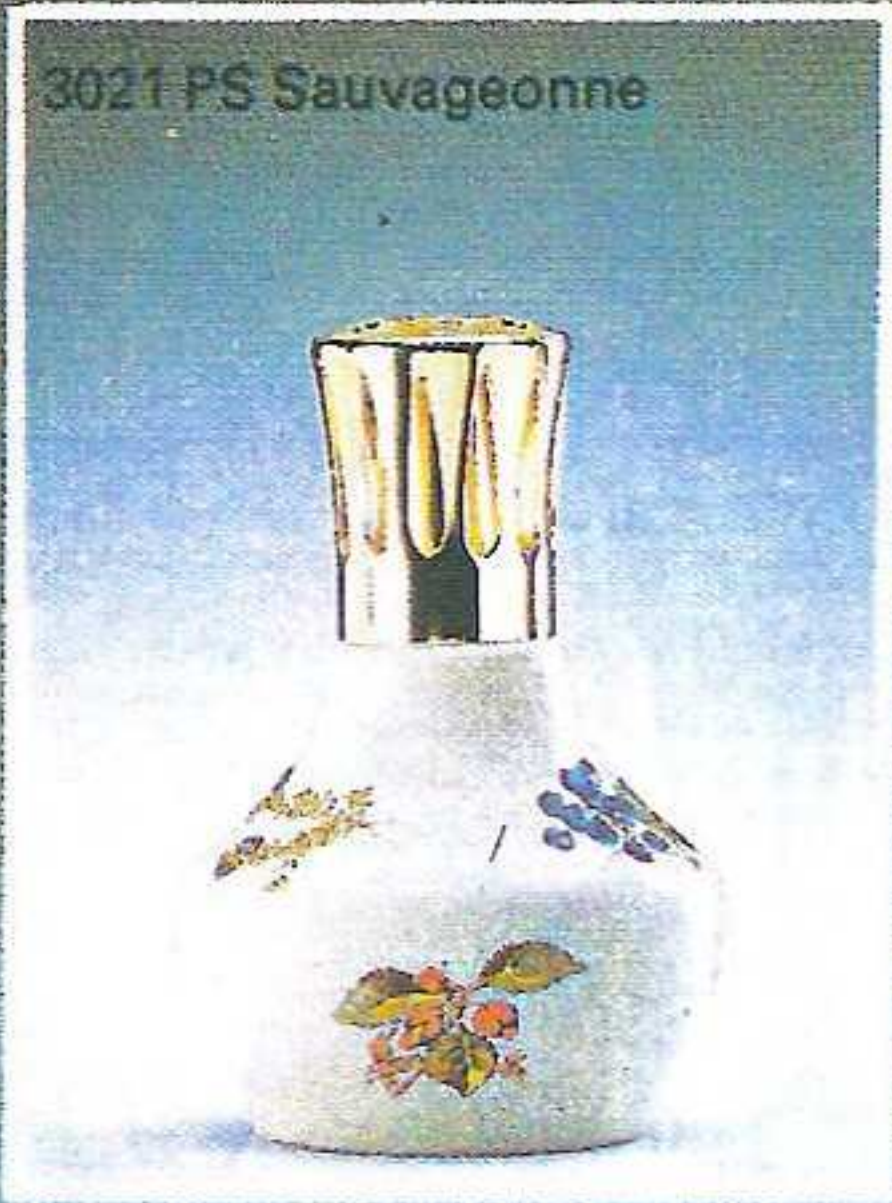

The main feature of the LAMPE BERGER, besides being a nice decorative accessory, is its ability TO ABSORB AND DESTROY tobacco smoke and other odors which infiltrate drapes, carpets and other fabrics.

Cristal de Sèvres

C'est ainsi que, dans la tradition maintenue d'un objet raffiné, la gamme des nouvelles Lampes Berger vous est offerte aujourd'hui.

THE HISTORY OF THE LAMPE BERGER

To experience the fragrance of a fresh flower is one of the world's most delightful pleasures. Now, by means of the LAMPE BERGER the delicate fragrances of fresh flowers can fill your home in an instant while destroying cooking and tobacco smokes.

In 1898, Marcel Berger, a pharmacist, discovered in his dispensary the amazing catalytic qualities of a product of his own invention which, as if by a miracle, absorbed odors and tobacco smoke. From this discovery came the LAMPE BERGER.

Made in Baccarat crystal, in china or by Gallé, the famous designer of the twenties, it became very much in vogue during the Belle Epoque.

Since then, modern science has enabled Marcel Berger's successors to unlock the secrets of his discovery and by understanding its principles they have been able to improve on it. The freshness of a garden has been captured for use in the home. Each room can be filled with the wonderful aromas of Lilac, Lavender, Primavera n° 1, Greenwood and others.

The LAMPE BERGER is simple and economical to use, and will add, in addition to fragrance, a lovely decorative accessory.

Each LAMPE BERGER comes complete with a bottle of AMBIANCE de BERGER. Refills are available as are replacement wicks.

LA BELLE ET LONGUE HISTOIRE DE LA LAMPE BERGER

En 1898, Marcel Berger, pharmacien de son état, découvrait dans son officine les propriétés étonnantes de la combustion catalytique d'un produit de son invention qui, comme par miracle, absorbait les mauvaises odeurs et la fumée du tabac.

Ainsi naquit la Lampe Berger.

Faite de Cristal de Baccarat, de Porcelaine ou signée Gallé, elle devint la coqueluche des salons de la Belle Epoque.

Les ressources nouvelles de la science ont permis aux successeurs de Marcel Berger de percer les secrets du miracle, et par la connaissance de ses causes, d'en perfectionner les effets.
